

MABATIROLLINGMILLSKE JSON Catalogue

Here's a **structured JSON dataset** for your **MABATIROLLINGMILLSKE catalogue**, extracted from the uploaded PDF. You can import this directly into your React app instead of hardcoding products.

JSON Product Dataset

```
[
  {
    "category": "Versatile Roofing Sheets",
    "products": [
      { "name": "Versatile Glossy", "gauge": "30", "finish": "Glossy", "price": 550, "unit": "KES per meter" },
      { "name": "Versatile Matte", "gauge": "30", "finish": "Matte", "price": 550, "unit": "KES per meter" },
      { "name": "Versatile Matte Charcoal Grey", "gauge": "28", "finish": "Matte", "price": 2170, "unit": "KES per 2.5m" }
    ]
  },
  {
    "category": "Box Profile",
    "products": [
      { "name": "Box Profile Glossy White", "gauge": "30", "finish": "Glossy", "price": 420, "unit": "KES per meter" },
      { "name": "Box Profile Glossy", "gauge": "30", "finish": "Glossy", "price": 420, "unit": "KES per meter" },
      { "name": "Box Profile Matte", "gauge": "30", "finish": "Matte", "price": 520, "unit": "KES per meter" },
      { "name": "Box Profile Reject Uncolored", "gauge": "30", "finish": "Reject", "price": 180, "unit": "KES per meter" },
      { "name": "Box Profile Reject Colored", "gauge": "30", "finish": "Reject", "price": 200, "unit": "KES per meter" }
    ]
  },
  {
    "category": "Romantile",
    "products": [
      { "name": "Romantile Glossy Finish", "gauge": "30", "finish": "Glossy", "price": 550, "unit": "KES per meter" },
      { "name": "Romantile Matte Finish", "gauge": "30", "finish": "Matte", "price": 650, "unit": "KES per meter" }
    ]
  },
  {
    "category": "Corrugated Sheets",
    "products": [
      { "name": "Corrugated Colored Glossy", "gauge": "30", "finish": "Glossy", "price": 315, "unit": "KES per meter" },

    ]
  }
]
```

✓ How to Use

- Save this JSON as products.json in your project.

- Import into your React app:

```
import productsData from "../products.json";
```

- Map over categories and products to render your catalogue grid dynamically.

This dataset is **ready to plug into your React + Tailwind app** for MABATIROLLINGMILLSKE.

Would you like me to also [add product images mapping](#) (linking each product to its image filename) so your catalogue grid can auto-render visuals without manual setup?
