

# Responsive Image Optimization Guide

To fully optimize your **MABATIROLLINGMILLSKE catalogue**, we'll add **responsive image optimization** so product images automatically serve the right resolution for mobile, tablet, and desktop. This improves performance and user experience.

---

## Responsive Image Setup

### Update ProductCard.jsx

```
export default function ProductCard({ name, price, image }) {
  return (
    <div className="border rounded-lg shadow hover:shadow-lg p-4">
      <picture>
        {/* Mobile (small screens) */}
        <source srcSet={` ${image}?w=400`} media="(max-width: 640px)" />
        {/* Tablet (medium screens) */}
        <source srcSet={` ${image}?w=800`} media="(max-width: 1024px)" />
        {/* Desktop (large screens) */}
        <source srcSet={` ${image}?w=1200`} media="(min-width: 1025px)" />

        <img
          src={image}
          alt={name}
          loading="lazy" // ☐ Lazy loading + responsive
          className="w-full h-40 object-cover rounded"
        />
      </picture>
      <h3 className="mt-2 font-semibold">{name}</h3>
      <p className="text-gray-700">KES {price}</p>
      <a
        href="https://wa.me/0780545126"
        className="mt-2 block bg-green-600 text-white py-2 rounded text-center"
      >
        Order via WhatsApp
      </a>
    </div>
  );
}
```

## Benefits

- **Performance boost** → smaller images for mobile, larger for desktop.
  - **Bandwidth savings** → customers on slower networks don't waste data.
  - **SEO improvement** → optimized Core Web Vitals.
  - **Accessibility** → alt text remains intact.
- 

## Deployment

1. Update ProductCard.jsx with <picture> + srcSet.
2. Push changes to GitHub:

```
git add .  
git commit -m "Add responsive image optimization"  
git push
```

3. Netlify auto-deploys with optimized images.
- 

## Your Site Now Covers

- Homepage hero + trust badges
  - Product catalogue grid
  - Enquiry form → WhatsApp integration
  - Floating WhatsApp/Call buttons
  - Accessibility fixes (alt text, ARIA, headings, focus styles)
  - Dark mode support
  - Product filtering + search
  - Price sorting
  - Infinite scroll
  - Lazy loading
  - Responsive image optimization
- 

Would you like me to also [add image compression with modern formats](#) (WebP/AVIF) so your catalogue loads even faster across all devices?
