

# WebP and AVIF Image Optimization

To make your **MABATIROLLINGMILLSKE catalogue** even faster, we'll add **image compression with modern formats (WebP/AVIF)**. This ensures customers get smaller, high-quality images across all devices.

---

## Responsive + Compressed Images

### Update ProductCard.jsx

```
export default function ProductCard({ name, price, image }) {
  return (
    <div className="border rounded-lg shadow hover:shadow-lg p-4">
      <picture>
        {/* Modern formats first */}
        <source srcSet={` ${image}.avif?w=400`} type="image/avif" media="(max-width: 640px)" />
        <source srcSet={` ${image}.webp?w=400`} type="image/webp" media="(max-width:
640px)" />

        <source srcSet={` ${image}.avif?w=800`} type="image/avif" media="(max-width: 1024px)"
/>
        <source srcSet={` ${image}.webp?w=800`} type="image/webp" media="(max-width:
1024px)" />

        <source srcSet={` ${image}.avif?w=1200`} type="image/avif" media="(min-width: 1025px)"
/>
        <source srcSet={` ${image}.webp?w=1200`} type="image/webp" media="(min-width:
1025px)" />

        {/* Fallback JPEG/PNG */}
        <img
          src={` ${image}.jpg`}
          alt={name}
          loading="lazy"
          className="w-full h-40 object-cover rounded"
        />
      </picture>
      <h3 className="mt-2 font-semibold">{name}</h3>
      <p className="text-gray-700">KES {price}</p>
      <a
        href="https://wa.me/0780545126"
        className="mt-2 block bg-green-600 text-white py-2 rounded text-center"
      >
        Order via WhatsApp
      </a>
    </div>
  );
}
```

## ⚡ Benefits

- **WebP/AVIF compression** → up to 80% smaller than JPEG/PNG.
  - **Responsive sizes** → mobile, tablet, desktop optimized.
  - **Fallbacks** → ensures compatibility with older browsers.
  - **Lazy loading** → only loads when needed.
- 

## 🚀 Deployment

1. Convert your product images into .webp and .avif formats (using tools like sharp, imagemin, or online converters).
2. Place them in /public/images/.
3. Update ProductCard.jsx with <picture> sources as shown.
4. Push to GitHub:

```
git add .  
git commit -m "Add WebP/AVIF image compression"  
git push
```

5. Netlify auto-deploys with compressed, responsive images.
- 

## ✅ Your Site Now Covers

- Homepage hero + trust badges
  - Product catalogue grid
  - Enquiry form → WhatsApp integration
  - Floating WhatsApp/Call buttons
  - Accessibility fixes (alt text, ARIA, headings, focus styles)
  - Dark mode support
  - Product filtering + search
  - Price sorting
  - Infinite scroll
  - Lazy loading
  - Responsive image optimization
  - **WebP/AVIF compression**
- 

Would you like me to also [add a CDN + caching strategy](#) so images and assets are served globally at high speed with cache-control headers?
